

## Protecting Patient Access to Office-Based Specialty Care

Congress is back in session and it's crunch time! This is a critical moment for you to make your voice heard and contact your member of Congress about the importance of supporting office-based providers by stopping ongoing Medicare cuts.

As Congress considers "doc fix" legislation this month, it is essential to support local specialist practitioners by tackling Medicare "relative value unit" cuts as well as "conversion factor" cuts. Additionally, it's crucial for policymakers to recognize and comprehend the distinctions between these two issues. You can view this explainer video for more details [here](#).

H.R. 3674 is gaining support thanks to providers like you are making your voice heard.

Failure to pass H.R. 3674 will result in more providers leaving the field (either through retirement or career adjustment), more practices being closed or sold, and a significant number of patients losing access to a variety of healthcare services in their communities.
